FORWARD

Planning is critical in ensuring proper implementation of budget and involvement of management at all levels in order to improve quality of educational service delivery. It serves as a basis for request and release of funds and provide platform for monitoring and evaluation of performance in any organization that put emphasis on accountability and transparency.

The decision to undertake these projects is apt and timely. It is in line with the management resolve to restore, sustain and leave behind a legacy of academic excellence and discipline in all its ramifications amongst the colleges.

I wish to thank the Executive Secretary for this support and for giving my department the opportunity to spear head the review process of the project. I equally wish to thank the entire management and supporting staff for their cooperation, contribution and commitment towards successful completion of the project.
